

Architex PureTech with Safe Front fabrics offer a double guarantee of hygiene from the factory to your home. The zinc pyrithione -based Safe Front antimicrobial component protects against bacteria and viruses by effectively reducing their activity, while the stain resistance component limits the penetration of bacteria and viruses into the fabric. This combined formula is effective even after multiple cleanings and years of use.

PureTech with Safe Front® acts on bacteria and viruses in two ways:

BACTERIA

Its **ISO 20743: 20138.1** certification was obtained demonstrating a **reduction of the bacterial population of 99.9%** on the fabrics after 24 hours.

VIRUSES

Its **ISO 18184:2019** certification was obtained demonstrating a **reduction of more than 90% in the virus population** after 2 hours of continuous contact with them.

Architex PureTech with Safe Front®
Antimicrobial Fabrics include:

PUREBRINDLE
PURECHENILLE
PURECHIC
PURENUBUCK
