

Architex®

CUSTOM WOVEN USA DIGITAL PRINT PROGRAM

The Architex Custom Design Studio offers more than 45 years of contract trade experience to your next custom textile project. Our design team will assist through their long-standing textile knowledge of color, weave structures, digital printing, fire resistance and fiber content characteristics to create fabrics for the most demanding projects.

Original textile – top. Printed version – bottom.

Value-Engineered Design

Your Design or Our Entire Line

Select any pattern in our existing line or bring us your own design to translate into a digitally printed textile.

Textile Ground Selection

Curated Base Qualities

Choose from a range of upholstery, drapery and panel base cloths to bring the pattern design to its fullest expression. Contact your rep for more information.

Digital Print Process

Striking Linework and Vivid Color

Our digital printed textiles are created through dye sublimation process. Pattern design is digitally printed on paper and then heat transferred to the textile.

Performance Standards

Textile Performance When and Where You Need It

All print grounds are tested to ACT contract-grade performance and flammability standards. Special treatments and FR finishes are available.

Lead Time

Quick Turnaround

All patterns are printed in the USA. Receive strike-offs within 5 business days and production orders within 4-5 weeks.

Pricing & Minimums

High-End Aesthetics, Fraction of the Cost

A 100 yard minimum is required for custom digital print projects. Please inquire on discounted pricing for volume orders over 500 yards.
