<b>Phenolic Based</b>	<ul style="list-style-type: none"> <li>• Wexcide</li> </ul>

Architex conducts their performance fabric cleaning testing under these four umbrellas of healthcare cleaner families and does not test by individual cleaner. To note, all Architex healthcare cleaner family testing is conducted in a lab with proper ratios and proper cleaning methods (including a water rinse) which may not necessarily reflect day to day maintenance within a facility. Before selecting any fabric, please determine what healthcare cleaner family is utilized within the facility. Architex International is not responsible for determining the healthcare cleaner family of a given cleaner brand.
