

Architex®

LightShield by WhataShield is a durable water repellent technology offering eco-friendly, non-fluorocarbon, PFAS-Free performance delivering superior protection against spills and stains.

The LightShield innovative and revolutionary finish forms a protective barrier on the fabric surface, preventing ink, oil and water-based spills from penetrating the surface and causing stains. Whether it's protecting interior or outdoor fabrics, LightShield offers an effective solution to ensure long-lasting protection so that fabrics remain clean and pristine for years to come. Apply LightShield to any woven or non-woven Architex pattern.

Contact your Architex Sales Representative for more information.
