

Image Accuracy

The resulting quality of images presented on this site can vary between patterns. This depends on many factors, including your own computer and display. Furthermore, the images of our fabrics that are shown to be upholstered on a lounge chair are entirely computer-generated. While every effort has been made to ensure that the scale and direction are as accurate as possible, these images are only meant to give an impression of what the finished piece might look like. Because of these circumstances, please procure a fabric sample and speak to your furniture representative before writing your spec or purchase order.

If a specific match is required, please submit a cutting with your order or request a cutting from our current production. Architex® reserves the right to make technical corrections to any product they deem necessary without prior notification.

Dye Transfer Disclaimer

Architex® will not assume responsibility for dye transfer caused by external contaminants. Certain clothing and accessory dyes (such as those used on denim jeans (indigo) or red dyes) can migrate to lighter colors. This phenomenon is increased by humidity/temperature and is irreversible.

Fabric Identification

Architex® makes every effort to ensure all items are properly tagged and marked. However, it is the purchaser's responsibility to confirm that goods received at the time of delivery indeed match purchase orders and specifications.

Architex® assumes no responsibility for improper fabric identification, application or installation. The customer should forward a sample to their respective manufacturer or installer for identification. Architex® will not cover any labor costs associated with improper fabric identification, application or installation.

Fabric Memos/Samples

All memo samples remain the property of Architex®. We reserve the right to recall any samples, as well as update and service our accounts without prior written permission.

Leather Orders

Due to the natural quality of leather and differences in hide size, a slight variation may occur between ordered and shipped quantities. Leather orders may have up to a 10% overage.

Abrasion Disclaimer

Abrasion test results exceeding ACT Performance Guidelines are not an indicator of product lifespan. Multiple factors affect fabric durability and appearance retention; including end-user application and proper maintenance.

Current ACT abrasion minimums:

Woven + Knit Fabrics (low traffic) | 15,000 Wyzenbeek double rubs / 20,000 Martindale cycles

Woven + Knit Fabrics (high traffic) | 30,000 Wyzenbeek double rubs / 40,000 Martindale cycles
